### *About Pro<sub>2</sub>Designs, LLC*

Headquarters in Conifer, Colorado at around 8,400 feet, Pro<sub>2</sub>Designs is a landscape design, consulting firm specializing in designing high-altitude perennial, annual, tree & shrub landscapes for commercial and residential customers.

We will custom design commercial/residential landscapes, using only plants that will survive the unpredictable mountain climate.

Yes, you can grow beautiful landscapes above 5,280 feet. We use our 10 years' high altitude landscaping expertise to solve any and all of your landscaping problems along Denver's Front Range. Pro<sub>2</sub>Designs offers

commercial and residential customers:

- Xeriscaping methods used
- Specialize in drought-tolerate plants
- Computer color landscape designs
- Before and after digital photography designs
- Perennials and annuals suited for high-altitude states and Denver's Front Range
- Landscape consultations
- Hanging baskets and containers planted with annuals
- Trees and shrubs suited for high altitude.
- Irrigation upgrades and conversions.
- Incorporating plantings

*Indian Summer Rudbeckia at 8,400 feet*

with the natural environment

- Indoor plant consulting

#### Points to Consider

- Improve the appearance of your property.
- Increase the resale value of your property.
- Create positive curb appeal with colorful landscape designs.
- Use Xeriscaping designs.
- Use drought-tolerate plants to control the drought.
- Don't let the drought control you.
